

## Harvest campaign started from "AGRO-2009" exhibition

XXI International agro-industrial exhibition-fair "AGRO-2009" took place at the National Complex "Expocentre of Ukraine" on 11-14 of June. The exhibition went through under the aegis of Ministry of Agricultural Policy and did involve all areas of agriculture.

This year, the AGRO exhibition welcomed 200 foreign companies from Germany, Denmark, Czech Republic, Holland, France, Poland, Belarus and also domestic manufacturers.

"Chervona Zirka" exposition area made up 450 m<sup>2</sup>. The model line of exposed techniques consisted of 9 units, among them were disc harrows Antares, Pallada, all-crop pneumatic seeders UPS-8-02, Vega-8 and seeding complex Sirius-10 that was presented at the agricultural exhibition in Astana and met approval of Kazakhstan agrarians.

Traditionally, the enterprise exposed co-production with the German company "LEMKEN". This year the pneumatic seeder Solitair 9 was amplified with the soil cultivating aggregate Heliodor 8/600.

"Chervona Zirka" production attracted attention of foreign visitors. It should be noted that, "krasnozvezdovskie" agricultural aggregates became of more heightened interest for the far abroad agrarians.

Due to agrarians' interest, "Chervona Zirka" dealers are ready to increase the purchase amounts of the new technique.

The factory "Chervona Zirka" is one of the oldest manufacturers of agricultural equipment in Europe. It was established by British brothers Robert and Thomas Elvorti in Kirovohrad in 1874.
