

AGRO-2009: Ukrainian Minister for Agricultural Politics Visiting WEDA

Volodymyr Chub of WEDA's Ukrainian general representatives, took advantage of the situation and introduced our WEDA company, our products and our field of activity to the minister. The minister took a keen interest in liquid feeding technology, a domain in which WEDA are global market leader. Melnik confirmed the great interest in this feeding system on behalf of the Ukraine and regards it as the future technology for pig breeding and pig managements.

The great interest in WEDA systems which Melnik made mention of was also mirrored during all three days of the fair. Numerous interested visitors were welcomed at the WEDA exhibition stand and were able to become convinced of the high quality and of the economic efficiency of the WEDA products.

In the Ukraine, too, WEDA are always ahead by a nose!
